

# TECH-KNOW-MADIC

DAY 3 WILL ENCOMPASS AN ARRAY OF RESOURCES TO EXPAND THE PERSONAL LEARNING ENVIRONMENTS THAT WERE CREATED IN DAYS 1 & 2.

## Wednesday, July 24th

### Creating, Publishing and Disseminating Digital Content

**Interactive Infographics** - Participants will learn how to create information graphics or Infographics as a visual tool for representation of data. Learning how to use infographics in the classroom will help participants learn ways to organize and gather information for a project to use comparative data for a presentation. Participants will learn how to organize data, select color schemes and design information into a one page visual representation on factual information. A second digital tool will be introduced to construct an interactive point of view by establishing a result for a thesis statement as an interactive project.

**Storing and Publishing Digital Content** explores the resources available to publish, share, and access media without using valuable memory space.

**Google Driven Collaboration** will explore the world of Google Drive as it relates to student collaboration and interactivity in the classroom and beyond. Participants will explore Docs, Spreadsheet, Forms, and self grading assessments.

**Digital Conversion Tools and ePublishing** - Providing a means for accessing online materials at home without the Internet has become essential as more and more classroom resources go online. With free conversion tools to make any website an ebook as well as converting documents to .pdf files, students can now take home online content even if they don't have access to the Internet at home.

## **DAY THREE: MORNING SCHEDULE**

### **Creating, Publishing and Disseminating Digital Content**

**Place: Dodge City Community College**

<b>TIME</b>	<b>LOCATION</b>	<b>TOPIC: KEYNOTE</b>
8:00 - 8:30	Auditorium	The World is Changing “Moving Forward”
